Lab 7
Merge Sort – Quick Sort – Shell Sort

1   HackerRank

https://www.hackerrank.com/communications-data-structures-lab-7

2   Notes

- You are required to use hackerrank and solve the challenges.

- You must use *scanf()* to read the integer value inputs to your program and *printf()* to write the output value from your program.

- You should work individually.

- You are encouraged to ask any questions on teams, or in person.

- Cheating will be severely penalized (for both parties). So, it is better to deliver nothing than deliver a copy!

Good Luck
